REPORT OF THE TRUSTEES.

CITY HOSPITAL,
BOSTON, April 30, 1871.

TO THE CITY COUNCIL:

In compliance with the ordinance, the Board of Trustees of the City Hospital respectfully present their Seventh Report of that Institution, being for the year ending this day.

The number of patients treated during the year is as follows:—

Patients in the Hospital May 1, 1870 173

Admitted,—

Medical 1,292

Surgical 1,040

Ophthalmic 55

Small Pox 9

————— 2,396

————— 2,569

Discharged 2,173

Died 215

————— 2,388

Remaining in the Hospital at this time 181

Largest number of patients in Hospital at any one time, 208

Smallest number of patients in Hospital at any one time, 135

Daily average of patients, 178 $\frac{1}{8}$

Average length of stay for each patient 27 days.

In the department for out-patients, there have been treated:

Medical patients 2,908

Surgical " 2,787

Ophthalmic " 1,694

Cutaneous " 1,195

Aural " 315

————— 8,899

The number of visits from them has been as follows:—

Medical	4,773
Surgical	9,175
Ophthalmic	11,540
Cutaneous	2,600
Aural	2,140
							— 30,228

Complete details of the patients treated, their diseases and results, together with the cost of maintaining the Hospital, are given in the reports of the professional staff and the Superintendent, transmitted herewith.

It will be observed that, since the annexation of Roxbury, which took effect on the 1st of January, 1868, the Hospital accommodations have been made use of to their utmost extent. Before that time the daily average of patients had been,—

For the year 1865	114
“ “ 1866	128
“ “ 1867	135

And since then,—

For the year 1868	172
“ 16 months to April 30, 1870	178 $\frac{1}{2}$
“ the year ending April 30, 1871	178 $\frac{1}{8}$

A very large number were refused admittance during the sixteen months, from Jan. 1, 1869, to April 30, 1870, by the examining physician, for want of room; and, by a careful record, it has been found that 268 applicants have been turned away the past year, for the same reason. There are 230 beds in the various wards and rooms, but it rarely happens that the different classes, medical, surgical and contagious, male and female of each class, are so exactly adjusted that every bed can be occupied at the same time. It has been the case but once in the history of the Hospital thus far. These facts are important, as giving force to the Mayor's suggestion in his annual address on the 1st of Jan. 1870: “Out of 730 applicants who were

denied admission during the past year, about fifty per centum were proper cases for treatment if sufficient room had been at the disposal of the Trustees. This fact, taken in connection with the increase of population by the annexation of Dorchester, and the prospect of still further extension of our limits, indicates that an enlargement of the Hospital will be required, if it should be deemed proper to continue its usefulness, and make it reasonably capacious enough to meet the demands which are made upon it, and have Boston maintain its reputation for liberal and needful public institutions." While, therefore, the Trustees point with great satisfaction to the large number of persons, from every variety of condition in life, who have availed themselves of the advantages afforded by such an establishment, and to the care with which it has been confined to those for whom it was originally intended, "such as require relief during *temporary* sickness," they are more than ever impressed with the conviction that the maximum of its usefulness, so far as room is concerned, has been reached. It may be the policy of the city to provide certain accommodations for the purposes indicated, and make the best possible use of them, rather than attempt to meet all the requirements of a rapidly growing community; but until such a conclusion has been somewhat formally announced, the Trustees have felt justified, after another year's experience, in again calling attention to the increasing demand for additional buildings. And they hope most earnestly that the present city government will give the subject the consideration it deserves, and adopt a course that will relieve the Trustees of any doubt hereafter as to the real intent of the Institution.

As appears by their report, the gentlemen of the staff feel hindered not a little in their work from the necessity of crowding too many patients into the wards, as well as from the great inconvenience arising from the location of the operating-room and the limited accommodations for the proper treatment of

accidents upon their first admission. All these disadvantages would be readily overcome by the erection of a new pavilion affording an opportunity for making other and better arrangements. The surgical out-patients' department, too, a very important feature in the attempt to administer relief where it is greatly needed, and at a very insignificant cost, is seriously restricted for the want of room. Whenever any such change as has been suggested above is made, this department will be provided for by a natural extension, and without any material outlay; simply occupying adjoining rooms now required for the reception of accidents.

The sum of ten thousand dollars has been appropriated by the present City Council with which to enlarge the boiler-house, provide a more suitable room for those dying in the Hospital, a Morgue for the reception and identification of the unknown dead found elsewhere, and other accommodations made necessary by the increasing use of the Hospital. In making these changes and improvements, the Trustees propose, as far as possible under the circumstances, to anticipate the wants of a larger number of patients than can at present be received.

The Trustees have never felt inclined to institute a comparison between the cost of maintaining patients here and elsewhere. Their ambition has not been to discover the lowest figure for which the work could possibly be carried on, at the sacrifice of every other consideration; but rather, by providing the best attendance and care, good and abundant food, neither luxurious nor profuse, and all the other proper appliances likely to ensure such a result, to relieve the largest number of persons in the speediest practicable time. There seems, however, to have arisen a strange and somewhat serious misapprehension on the part of some as to the actual expenditure incurred in this effort.

The whole number of 2,569 patients were in the Hospital, at an average of 27 days each, 69,363 days, or 9,909 weeks. The entire payments for the year, including everything, excepting

only the cost of the Quinquennial Medical and Surgical Reports, was at the rate of \$10.16 per week, \$100,687 10

But of the patients enumerated above, 104 paid for

331 weeks board,*	5,686 88
-----------------------------	----------

Leaving, therefore, the sum of	\$95,000 22
--	-------------

as the cost to the city of treating 2,465 patients for a period of 9,578 weeks, which is at the rate of \$9.92 per week. In making up this statement, nothing has been deducted for the expense of the out-patient departments; their cost is estimated at fifteen hundred to two thousand dollars.

No account is here made of interest upon the first outlay, the present value of the land if it were sold, or the amount of taxes it would give if occupied and improved as private property. The premises have been dedicated to their present use; the buildings have been erected; the only consideration now, is the annual sum requisite to continue a purpose fully and deliberately formed at the outset. No estimate is made, either, of the rich returns, in everything that tends to comfort, elevate and prosper a people, from those who have been restored to health, to their homes, and to their regular pursuits.

The first series of Medical and Surgical Reports, embracing a large number of very interesting cases during the first five years of the history of the Hospital, has been published; and distributed to members of the city government, to all the principal libraries and medical societies in this country, and widely to societies and distinguished members of the profession abroad. The highly gratifying references to it in the many acknowledgments to the Trustees, render it certain that it is recognized very generally as a valuable addition to the science of medicine and surgery.

* The ordinance, Sec. 7, provides that the trustees may, when compensation therefor is made, afford separate apartments and more accommodations than those which are customary when no compensation is made.

A generous addition to the library for the patients has been made the past year, chiefly by a contribution from Messrs. Fields, Osgood & Co. The constant use made of the books is a source of great satisfaction, as tending to occupy the minds of the patients, and in that way restraining them somewhat from a disposition to dwell upon their own maladies, or be disturbed too much by the suffering of others. The books, however, are rapidly worn out, and the Trustees do not hesitate, in the interest of those who derive from their use so much real enjoyment, to ask further and frequent donations from such collections as can easily spare occasional volumes, that mind and body may be helped on to a better condition at the same time.

The income of the Norcross and Ball Clothing Fund has been employed in relieving the necessities of those for whom it was specially designed.

The services on the Sabbath were intermitted for a while after the usual time for commencing them in the autumn, so few of the patients being able then to attend. After being resumed they have been continued regularly, quite fully attended much of the time. They have been conducted by clergymen of nearly all the different denominations, and the Trustees desire to return their acknowledgments for the kindly and cheerful manner in which their applications have been responded to.

No changes have been made during the past year in the professional staff. Its members have taken a lively interest in every movement or plan calculated to enhance the usefulness of the Institution, and sustain its position as one of the most attractive charities in the city. The Trustees are indebted to them and to the Superintendent for constant and efficient assistance in carrying out the design of its establishment.

JOHN T. BRADLEE, *President.*

SUPERINTENDENT'S REPORT.

SUPERINTENDENT'S OFFICE, CITY HOSPITAL.

TO THE BOARD OF TRUSTEES:—

GENTLEMEN, — At the close of the fiscal year, ending April 30, 1871, the Superintendent is again called upon to present to your Board the history of our annual labors. The Hospital has accommodated within its wards during the past year 2,569 persons, with a daily average of 178 1-8.

The following table gives the numbers, from year to year, applying for admission and being treated at the City Hospital.

	From June 1st, 1864, to Dec. 31st, 1864.	From Jan 1st, 1865, to Dec. 31st, 1865.	From Jan 1st, 1866, to Dec. 31st, 1866.	From Jan. 1st, 1867, to Dec. 31st, 1867.	From Jan. 1st, 1868, to Dec. 31st, 1868.	From Jan. 1st, 1869, to Apr. 30th, 1870.	From May 1st 1870, to Apr. 30t 1871.	TOTAL
Patients examined by Admitting Physician .	459	1,081	1,278	1,338	2,134	3,839	3,366	13,545
Patients admitted by Admitting Physician .	231	696	961	959	1,483	2,311	1,785	8,426
Patients admitted by Superintendent . . .	244	370	471	515	595	743	611	3,809
Patients admitted	475	1,066	1,432	1,534	2,078	3,054	2,396	12,035
Patients accidentally in- jured	129	242	345	328	417	432	525	2,468
Number of out-patients treated	371	1,143	3,324	7,015	8,794	11,721	8,899	41,267

OUT-PATIENT DEPARTMENT.

The out-patients' department has been a source of great relief during the past year. The number of persons coming to the Hospital in the several departments for advice is as follows: eight thousand eight hundred and ninety-nine.

Medical, under the charge of Drs. Mackie & Knight, . . .	2,908
Surgical, " " " " Drs. Gavin & Gay, . . .	2,787
Ophthalmic, " " " Drs. Williams & Wadsworth	1,694
Skin Diseases, under the charge of Dr. Damon,	1,195
Ear, under the charge of Dr. Green,	315
Total,	8,899

The following Table will show the visits in the several departments, amounting to 30,228.

Visits from out-patients treated.

Daily average number in Hospital,	178 $\frac{1}{2}$
Largest number at any one time in Hospital,	208
Smallest number at any one time in Hospital,	136
Number treated in small-pox department,	9
Average time remaining in Hospital,	27 days

RECAPITULATION.

Medical patients admitted,	1,292
Surgical patients admitted,	1,040
Ophthalmic patients admitted,	55
Small-pox patients admitted,	9
<hr/>	
Total,	2,396

CONDITION OF PATIENTS DISCHARGED.

Recovered,	1,040
Relieved,	908
Not relieved,	131
Not treated,	94
Died,	215
<hr/>	
Total,	2,388

The rate of mortality this year has been 9 per cent. In the number of deaths, many have been caused by accidents or acute disease, the patients not being transferred to the Hospital until they were beyond the reach of medical aid, and dying soon after entering. This year 56 deaths have occurred within 48 hours after admission.

It must be gratifying to all who delight in doing good, to know that so many of the poor and suffering among us have availed themselves of the benefits of the Hospital, where they receive the best remedies and treatment that the present state of medical science affords. From the first opening of the Hospital to the present time, the calls for relief have continually increased, until the Institution is wholly inadequate for its demands. The crowded state of the wards, at some seasons of the year, is contrary to all sanitary principles. We are not prepared to receive any increased numbers under any emergencies,—such has been our condition the year past. The religious services on the Sabbath have been conducted as in past years, and much interest manifested. In conclusion, I feel under the greatest obligation to each member of your Board, and the Medical Staff, for continued kindness and courtesy during the year.

Very respectfully,

L. A. CUTLER,

Superintendent.

REPORT OF HOSPITAL STAFF.

CITY HOSPITAL, April 30, 1871.

TO THE BOARD OF TRUSTEES:

The following Report exhibits the number of patients who have been treated in the various departments of the Hospital during the past twelve months, together with a classification of their diseases, and the results of treatment:—

TABLE OF MEDICAL DISEASES,

Classified according to the Nomenclature of Diseases, as published by the Royal College of Physicians of London, and American Medical Association.

MEDICAL.—*Continued.*

In making their Annual Report, embodying a record of the relief of thousands of our fellow-citizens, the Medical Staff invite the attention of the Trustees to the pressing need, becoming every day more urgent, of enlarged and improved accommodations, to increase the efficiency of the Hospital, to enable it to receive all who have a just claim to its benefits, and to render it worthy of the position it holds, at the head of our city charities.

The great addition to the population of Boston since the Hospital was established, together with the annexation of large and populous districts, have rendered the present buildings wholly insufficient for the purposes they were intended to fulfil; and the Staff find their efforts crippled in every direction, by the want of sufficient space and proper facilities. It has been necessary to have more beds in the large wards than accords with the welfare of the patients, and the rooms in the basement, unsuitable for the successful treatment of eye and other critical diseases, have been occupied for these cases, for want of other accommodations. No provision, whatever, is made for lying-in women, and cases occur where deserving persons are forced, at this critical period, to seek refuge where they can have but incompetent assistance, instead of being properly sheltered and cared for in their hour of need.

The amphitheatre for operations is not only too small and destitute of all conveniences, but is at almost the farthest distance from the surgical wards, so that patients must undergo a long, painful and even dangerous transportation before they can be placed in their beds; thus seriously compromising the results of operations.

The accident room also affords but insufficient facilities.

The ill effects of over-crowding, alluded to in our last Report, continue to be felt in the pavilion for contagious diseases.

The Staff also ask leave to suggest, as in their judgment a most important sanitary and economical measure, the establish-

ment of a convalescent department, for the reception of such patients as no longer require active medical treatment, though they are not sufficiently well to return to their homes and labors with safety.

The city would thus be relieved from the more expensive maintenance of such persons in this Hospital, while at the same time its beds would become available for the reception of cases of acute disease requiring prompt and active treatment.

Respectfully submitted by

HENRY W. WILLIAMS,

J. NELSON BORLAND,

W. C. B. FIFIELD,

Committee of the Hospital Staff.

OUT-PATIENTS' DEPARTMENT.

MEDICAL.

IN CHARGE OF DRs. MACKIE AND KNIGHT.

TO THE BOARD OF TRUSTEES, CITY HOSPITAL:—

GENTLEMEN,—On the completion of another year, we respectfully present to the Board of Trustees the annual statement of the operations and condition of the Medical Department of the City Hospital. The number of patients treated in this department has been 2,908. The daily average attending has been 30 31-52, — the decrease in number compared with previous years being due to the fact that no medicines have been given away. The prevailing diseases have been Chronic Rheumatism, Dyspepsia, Anæmia, Phthisis and Bronchitis; these affections being the most common among the laboring class of our population. We cannot but express a feeling of satisfaction at the working of this department when we consider the success attending our efforts to relieve those applying for treatment. In conclusion, we would express our hearty thanks for the cordial and efficient manner in which the Hospital internes and externes who have been associated with us have performed their duties, and to the Superintendent and Trustees for their uniform kindness in assisting us to carry forward the work of this department.

Respectfully submitted,

WM. B. MACKIE, M. D.

F. I. KNIGHT, M. D.

OUT-PATIENTS' DEPARTMENT.

S U R G I C A L.

IN CHARGE OF DRS. GAVIN AND GAY.

BOSTON, April 30, 1871.

TO THE TRUSTEES OF THE CITY HOSPITAL:

GENTLEMEN,— We herewith present our Annual Report of the Surgical Out-Patient Department for the year ending April 30, 1871.

As the business of this branch of the Hospital is rapidly increasing, we would respectfully call your attention to our need of more room. We often have from forty to fifty patients, daily, and our present quarters are much too limited for their proper accommodation.

Respectfully submitted,

M. F. GAVIN, M. D.,
GEO. W. GAY, M. D.,

Surgeons to Out-Patients.

TO THE TRUSTEES OF THE BOSTON CITY HOSPITAL:—

GENTLEMEN,— I beg leave to submit herewith the report of the Aural Department of the Hospital. During the past year 315 patients have applied for treatment in this branch of the institution, and the number of visits has been 2,140.

The apparent slight discrepancy between the total number of patients and that of diseases, is owing to the fact that some few show different diseases in the two ears, and must consequently appear in two places.

The results have been, as a rule, very satisfactory, but, as it is impossible to give the statistics, this part of the report must always be unsatisfactory and unreliable in an out-patient department where the patients come and go at will. The attendance has, however, been quite regular, and the willingness to pursue treatment most encouraging.

Nearly one-half of the cases applied in the early stages of disease, when treatment is always much more satisfactory than after a long lapse of time, when permanent and irreparable injury may have taken place. The increased percentage in such acute cases shows that the public are appreciating more and more the importance of early treatment and the danger of delay. A rich field has also been afforded for studying the various conditions, causes and treatments of the chronic diseases, and in one class more particularly (the chronic otorrhœas), I think that a decided advance both in methods of treatment and results can be claimed within the last year.

Several cases on applying at the Hospital have been in the greatest danger, not only of losing their hearing, but also their lives, from the severity of an inflammation, and have been in such a state that their attendance as out-patients was absolutely impossible. While some of them were taken into the house through

the courtesy of the attending physicians and surgeons, I regret to say that others I have been obliged to send away, on account of the crowded condition of the Hospital, which forbade filling the beds with especial cases to the exclusion of the more general diseases. A number of cases requiring operation when there was risk of hæmorrhage, or where special care in the after treatment was required for a short time, I have also been obliged to send away unrelieved. A number of both these classes of cases, where not only the special organ, but the very life of the patient depend on immediate, thorough and careful treatment, such as can be carried out only within the Hospital, appear every year, and the necessity of providing for the reception of such will be yearly more urgent.

The great variety in the cases has given a most excellent opportunity for clinical teaching, which I have endeavored to improve on those days when the students visit the Hospital, as far as my small consulting room would allow.

Respectfully submitted,

J. ORNE GREEN.

OUT-PATIENTS' DEPARTMENT.

CUTANEOUS DISEASES.

IN CHARGE OF H. F. DAMON, M. D.

TO THE BOARD OF TRUSTEES OF THE BOSTON CITY HOSPITAL:—

GENTLEMEN,—In communicating to your Board the third annual report of the department for cutaneous diseases among outpatients, I am not unmindful of the trust you have imposed in me by placing under my treatment so many difficult, and, in numerous instances, almost intractable diseases.

Since the establishment of this department, over three thousand cases have been treated, and about ten thousand visits made to the hospital by patients while under treatment. During the past year, 1195 new cases have been treated, and 2600 visits made by these patients. The City Hospital has thus been instrumental in presenting, on a large scale, facilities for the treatment of cutaneous, as well as other diseases requiring a special knowledge for their thorough and efficient management.

Respectfully submitted,

HOWARD F. DAMON, M. D.

BOSTON CITY HOSPITAL, April 30, 1871.

B E Q U E S T S.

Elisha Goodnow, of Boston, by will dated July 12, 1849, makes the City of Boston residuary legatee to his estate, real and personal, for the benefit of a City Hospital. *Provided*, that one-half of the proceeds shall be applied to the establishment and perpetual maintenance of *free beds*, under the control of the government and officers of the said Hospital for the time being.

The following sums of money have been received: —

1862, June 9. From executor's balance of account at Probate Office	\$623 85
1864, April 14. Proceeds of sale of estate on Cross Street, containing 6,228 square feet of land	\$14,907 12
Old buildings upon same	223 00
1864, December 31. From City of Boston, for 225 square feet of land taken from above estate to widen Cross Street	523 36
	—
	15,653 48
1864, July 1. Interest on same from city to this date	222 67
	—
	\$16,500 00
<i>Amount carried forward</i>	\$16,500 00

<i>Amount brought forward</i>	\$16,500 00
1867, November 30. From Boston, Hartford and Erie R. R. for 5,167 square feet land taken by New York Central R. R. from Estate on Third Street, South Boston	3,875 25
1868, January 1. Proceeds of sale balance of estate on Third Street, South Boston, 1,516 square feet	758 00
				<hr/>
				\$21,133 25
				<hr/>

1869, January 1. Of the above amount, say \$20,500 is invested in city scrip, interest payable semi-annually, at six per cent per annum, and deposited with the City Auditor, who is required to receive the interest upon the said scrip, and add the same to the moneys appropriated for the use of the Hospital.

The balance on interest in the hands of the City Treasurer, to be invested as above, is \$633.25.

1868, January. The \$10,000 deposited by the Executors of Mr. Goodnow, June 22, 1852, with the Massachusetts Hospital Life Insurance Company, the interest upon which is to be paid to the widow, will, upon her decease, be distributed as follows:—

\$500 to the Penitent Females' Refuge.

\$5,000 to City of Boston; income to be expended for the relief of sick and infirm persons.

\$4,500 to be added to the fund heretofore provided for the support of free beds in the City Hospital.

Lawrence Nichols, of Boston, by will dated August 19, 1862, and recorded Suffolk Registry of Wills, vol. 160, fol. 140, bequeathed to the City of Boston, towards the support of a City Hospital, the sum of one thousand dollars.

1863, April 29. The executor of Mr. Nichols paid the City Treasurer \$1,000, less the United States tax	\$937 25
The City of Boston paid interest on same	62 75
	<hr/>
	\$1,000 00
	<hr/>

1864, July 1. The above amount, say \$1,000, has been invested in City of Boston scrip, dated July 1, 1864, twenty-years, with six per cent interest, payable semi-annually, and deposited with the City Auditor, as required by ordinance.

1865, March 14. Received as Residuary Legatee, from the estate of Mr. Nichols, and now in the hands of the Treasurer	\$530 50
	<hr/>

1868, January 1. The Trustees received the sum of two thousand dollars from Hon. Otis Norcross, as the foundation of a fund for the benefit of patients leaving the Hospital, poor and destitute of proper clothing. The principal sum is invested in a City of Boston interest-bearing note, to be deposited with the City Auditor, the interest of which to be collected annually or oftener, and paid over to the President of the Board of Trustees, for the time being, of the City Hospital, to be by him expended at his discretion for the benefit and temporary assistance of those patients who are in his judgment deserving, and who are destitute of proper clothing in which to leave the Hospital, and having no means of procuring it.

Balance on hand May 1, 1870	\$105 66

\$60 00

RULES FOR ADMISSIONS AND DISCHARGES, ETC.

Applications for admission of patients shall be made at the Hospital on each day of the week, Sunday excepted, between 9 and 11, A. M.

Whenever able, the patient shall apply in person. When not able to appear in person, application may be made by a friend, and the patient shall be visited by the Admitting Physician, or one of the House Officers.

Any Trustee, or either of the Physicians or Surgeons in attendance may, in case of emergency, send a patient in the first instance to the Hospital by written permit, and the Visiting Committee shall, on the certificate of one of the medical officers designated for the purpose, decide as soon as may be afterwards whether such patient shall remain.

Persons accidentally wounded, or otherwise disabled or injured, shall be received at all hours.

Permits for admission shall be subject to the approval of the Visiting Committee for the time being, or, in their absence, to that of the Superintendent.

The Visiting Committee, however, shall have the power at any time to require the Superintendent to report to them the names of applicants before admitting them, and may dismiss any patient whom they think improperly admitted.

Patients discharged on the recommendation of the Physicians or Surgeons, shall be provided with a certificate stating their condition at the time of discharge, whether cured, relieved or not relieved, which certificate shall be signed by the Superintendent.

Whenever a patient is removed from the Hospital without the consent and approval of the Superintendent, he shall require from any person assuming the responsibility of the removal, a written statement to that effect.

The Superintendent shall not deliver the body of any person dying at the Hospital without a written receipt from the parties taking the same.

In case of the decease of any patient, the Superintendent shall sign a certificate to that effect, and shall furnish the City Registrar with a copy of the same. He shall also state the time and cause of death, the disposition made of the body, whether delivered to friends, or buried from the Hospital. In the last case, he shall mention the place of interment.

Patients may be admitted by the Trustees to the privileges of the Hospital, at such rates of board as they may from time to time determine; such board being secured by their friends, or by the authorities of the place to which they belong.

In cases where, in the opinion of the Trustees, the circumstances of the patient will warrant it, the whole or a part of the board shall be paid. If separate apartments, or articles not usually furnished at the Hospital are provided, such payment shall be made therefor as the trustees shall deem reasonable.

HOUSE RULES.

Patients must be in their proper places in the wards during the visit of the Physicians and Surgeons, and always by 8 P. M., unless specially exempted by the Superintendent.

Those free patients who are able, are expected to assist in nursing, and in such other services as may be reasonably required of them.

Patients shall not leave the Hospital Grounds without a pass from the Superintendent, nor the respective wards without the consent of the nurse in attendance.

No patient shall purchase, or cause any member of the household to purchase for him, any article of food whatsoever, nor any other article, without the consent of the Superintendent; nor shall any officer or servant of the Hospital receive a gift or fee from a patient.

Profane or obscene language, loud talking and incivility, are prohibited.

No patient having acute syphilitic disease, or *mania-a-potu*, shall be admitted as a charity patient, or at a lower rate than twenty-five dollars a week for the former, and fifteen dollars for the latter.

No person shall be admitted to the Hospital whose case is judged to be incurable, unless there be urgent symptoms which in the opinion of the Physician, or Surgeon, are capable of being relieved.

Patients may be visited by clergymen of their own selection; and where there is a wish for the performance of any particular religious rite, it shall be indulged, when practicable.

It is expected that patients will implicitly obey the rules of the Hospital. Complaints, for whatever cause, may be made to the Superintendent or Visiting Committee, and when reasonable, shall be by them reported to the Trustees.

All employés must be in their respective places during their hours of duty. The doors and gates of the Hospital will be closed at 10 P. M., at which time all are expected to be quiet, and those not on duty, in their own rooms.

The use of tobacco, wine and intoxicating liquors, is prohibited within the Hospital, unless prescribed by a physician.

VISITORS.

No person shall visit any part of the premises, except on business, or at such times as may be fixed for the reception of visitors, without the permission of the Superintendent, or of some one of the Trustees.

On Monday, Tuesday, Thursday and Saturday of each week, from two to three o'clock, P. M., friends may be permitted to visit patients, though no patient shall receive more than one visitor on the same day. In all cases, however, the Trustees or Superintendent may exercise discretionary powers as to excluding or admitting visitors.

All visitors must leave when the bell rings, at the expiration of the visiting hour.

No visitor will be permitted to take any meal in the Hospital, or pass the night therein, without permission from the Superintendent, or one of the Trustees.

No visitor shall be allowed to give any article of food or drink to a patient, unless by permission of the nurse; and any article sent to the patients shall be left with the Superintendent.

NURSES.

Nurses are required to be in their several wards each morning ready for duty, before the night watchers leave the same.

They shall decide what clothing, or other articles patients are to retain in the ward, and shall give or allow to be given to patients only such articles of food or drink as may be permitted by the Physician or Surgeon in attendance.
